Clients

**35+**  
Team

PRR Technology Pvt. Ltd. was established in 2013 out of a passion for cutting-edge technology services. We began our journey as a web design and development company in Dilsukhnagar, Hyderabad. Today, we have stretched out our services beyond web design and development and ventured into creating web apps, software, mobile apps, domains, hosting, digital marketing, social media management, and graphic designing too.

Our team of enthusiastic, energetic, and dynamic designers and developers work together to deliver the most powerful and innovative solutions. We are a team of fully devoted and well-experienced professionals who have never failed to provide an award-winning technology solution to our clients. We work neither to exceed the cost and effort nor to fall behind on the objectives. We are totally concerned about providing 100% project delivery in terms of time, cost, design, and performance.

We make every effort to provide the utmost technology solutions to every business and individual through creative and ingenious inputs and envision leading the global tech world through abstract service in optimizing online visibility and digitalization.

#### **Our Vision @ PRR Technology Pvt. Ltd.**

# TECHNOLOGIES WE USE in PRR Technology Pvt. Ltd.

# WORK METHODOLOGY- PRR Technology Pvt. Ltd.

1

## **Analysis**

Analysis is the first and most important step for any project. This process is initiated with discussion and a few queries to figure out the nature of the desired project and objectives. We too, analyze the design and functionality of the project that the client has visualized. Analysis helps in creating a basis for other work processes.

2

## **Strategy and planning**

On the basis of requirements and objectives, a framework is derived and presented to the client. A detailed discussion is held to figure out if anything is to be added, improvised, or removed. Here we derive a final outline of design and functionality, develop strategy, and create work plans and schedules for mobilizing manpower and resources.

3

## **Design and Development**

As per the finalized strategy and plans, we proceed towards building the project. Our professional designers and developers use every possible technology to deliver 100% result.

4

## **Test and Deployment**

Following the design and development work, we undergo testing or observation from our side and then provide a demo copy to the client for the same purpose. This helps in figuring out any inaccuracies if present. After amending all the errors and weaknesses, if present, the deployment or delivery of the project is done.

5

## **Maintenance and upgrade**

We have a separate team of experts who provide reliable support for the maintenance and upgrade of our projects. The team works to avoid errors and breaches and ensure that the products are up-to-date with the latest technology and deliver effective and efficient output with excellent performance.

# SOME RECENT PROJECTS

## Nepal Traveller

[www.nepaltraveller.com](http://www.nepaltraveller.com)

Nepal Traveller Digital Publication is a production house that looks at promoting digital content in Nepal. We are the online publishers of Nepaltraveller.com a website that is dedicated to the promotion of tourism and Nepal as a destination. We work closely with the Nepal Tourism Board and all stakeholders in the industry to highlight and promote the best that is in Nepal for tourists to enjoy as well as outbound destinations for Nepali travellers.
